DataTraveler Locker+

Put a lock on your personal data.

With identity theft on the rise, personal security should be your number-one priority. Kingston's DataTraveler® Locker+ provides affordable, easy-to-use, automatic personal security for your files when you're on the go. It safeguards against unauthorized access to your information in case the drive is lost or stolen.

Kingston's DataTraveler Locker+ USB Flash drive has 100-percent security to protect all of your everyday files as well as your most sensitive data. The easy-to-use, step-by-step process walks you through your password creation. Once your password is established, all of your data will be protected against intruders and the drive will shut down and reformat after 10 invalid attempts to access it.

DataTraveler Locker+ features a swivel design for ease of use and capacities up to 32GB.

DataTraveler Locker+ supports Mac OS X, Windows® 7, Vista®and XP and is backed by a five-year warranty and legendary Kingston® reliability.

"This little USB Flash drive is amazing! … I can feel safe when I leave it lying around, knowing no one can get my information. It is a password-protected Flash drive that only I know the code to! How cool is that. Since I travel to and from work … I can save my information on the DataTraveler Locker+ and then open it up on my other laptop either at home or work. I love it. You too will find it the most amazing device and you don't have to worry about security!"

"The Kingston DataTraveler Locker+ is a great Flash drive with the security that I was looking for. The security feature really comes in handy, especially to keep away unwanted viewers and to keep important documents from unwanted eyes. It is also great to keep private and personal files safe. I can now carry it without worrying that I will lose it and my confidential information is going to land in the wrong hands."

BzzAgents, May 2011

Kingston® TECHNOLOGY

DataTraveler Locker+
